Backend: PHP, Laravel (MVC & API), RESTful APIs, JWT & OAuth authentication, JSON

Frontend: React.js, JavaScript, AJAX, Axios, Bootstrap, Material UI, Chart.js

Database: MySQL

Tools: Git, GitHub, Composer

PROFESSIONAL EXPERIENCE

Software Developer (Low-Code Workflow) October 2025 – Present

Archirodon Group N.V. | New Cairo, Cairo, Egypt

- Design, build, and deploy business workflow processes on a low-code workflow management system supporting a global marine construction and engineering group.
- Translate requirements from business stakeholders into process maps, forms, approval routes, and business rules.
- Configure forms, data fields, and integration logic to connect processes with business data.
- Test, release, and support live processes; troubleshoot issues and deliver enhancements based on user feedback.

Backend Developer October 2024 – September 2025

e-RAMO for Digital Solutions | Nasr City, Cairo, Egypt

- Developed and maintained scalable server-side applications for CRM, accounting, booking, and real estate systems using Laravel and MySQL.
- **CRM System:** lead, deal, and task management with progress tracking to keep deals on schedule.
- **Accounting System:** income, expense, and employee salary management with detailed financial reports for decision-making.
- **ChairLocation – Booking System** (chairlocation.com): booking of workspace chairs, offices, and desks, with order statuses and membership packages with a points-based rewards system.
- **Amtalek – Real Estate System** (amtalek.com): property listings (location, price, features), search and filtering, and handling of user inquiries and booking requests.
- Collaborated with cross-functional teams to deliver high-quality software solutions.

Backend Developer (Freelance) August 2024 – October 2024

Money Leek | Tanta, Gharbia, Egypt

- Developed and maintained backend systems with Laravel and MySQL, and designed RESTful APIs for frontend integration.
- Ensured security and performance through robust coding practices and regular testing.
- **Hanakol Eah** :food delivery website built with Laravel MVC and MySQL.
- **Monza Car:** car rental website built with Laravel MVC and MySQL.

Backend Developer Intern February 2024 – April 2024

Al-Noras Company | Digital Marketing & Information Technology

- Developed RESTful APIs with Laravel for multiple client projects, integrating databases and server-side logic.
- **Scientific Journal** (live demo): journal platform for the Faculty of Science built with React.js, Laravel API, and MySQL.

SIDE PROJECTS

ABC Juice – E-commerce Platform View Project

Tech: Laravel, MySQL

- Developed the backend of a full e-commerce platform, covering product management, order processing, and online payment handling.
- Built a customer wallet, a points-based rewards system, and purchasable packages, with server-side logic keeping balances and orders consistent.

Remedies App – Subscriptions, Courses & AI Content View Project

Tech: Laravel, MySQL, In-App Purchases, AI Integration

- Built the backend and admin dashboard for a remedies app where users browse remedies, take courses, and subscribe to paid plans.
- Integrated in-app purchases to handle paid subscriptions.
- Integrated AI into the dashboard to generate remedy content, speeding up content creation for admins.

Ghali Group – Portfolio Website & Dashboard View Project

Tech: Laravel, MySQL

- Developed and maintained the backend and admin dashboard for the group's official website, focusing on performance, security, and scalability.

Tadawy – Blood Donation Management System (Graduation Project) Watch Demo

Tech: React.js, Laravel API, MySQL, Chart.js, Bootstrap, Material UI

- Designed and built a comprehensive blood donation management system with a React.js frontend consuming a Laravel REST API.
- Built interactive dashboards and data visualizations with Chart.js and a responsive UI with Bootstrap and Material UI.
